**HOLLOWAY'S PILLS.**

ures. The first irregularity of any function should be checked and set right by appropriate doses of these fine purifying pills, which strengthen the system by thoroughly cleansing the blood from all impurities. They balance disordered action, remove the cause of disturbance and restore its normal and natural power to overcome without effort.

**Derangement of the Bowels, Liver and Stomach Complaints.**  
This medicine is so well known in every part of the world, and the cures effected by its use are so wonderful as to astonish every one. Its pre-eminence as a remedy

the stomach and bowels, is no longer a matter of dispute or doubt. In these diseases the beneficial effects of Holmway's invaluable Pills are so permanent and extensive that the whole system is renovated, the organs of digestion strengthened, and full and easy assimilation protected, so that both physical and moral energy are increased.

This is generally occasioned by some irregularity of the stomach and bowels, which, if not quickly attended to, frequently terminates fatally. A few doses of the Emetic Pills never fail to give tone to the stomach, regularity to the secretions, and purity to the fluids. Vertical dimness of sight and other indications of approaching

**The Female's Best Friend**  
For all debilitating disorders peculiar to the sex and every contingency perilous to the life of women, youthful or aged, married or single, this mild but speedy remedy is recommended with friendly earnestness. I will correct all functional diseases of the female system.

**Scrofula and all Skin Diseases.**  
For all skin diseases, however inveterate, these medicines are a sovereign remedy. While the Pills act upon the blood, which they purify, the ointment passes through the pores of the skin, and cleanses every structure, as water saturates hemp, or as salt penetrates

**Coughs, Colds and Asthmas.**  
No medicine will cure colds of long duration or such as are settled upon the chest so quickly as these famous Pills. Even in cases where the first stage of asthma has appeared these Pills may be relied on as a certain and

**Indigestion--Billious Headache.**  
These complaints may sometimes be considered trifling, but it should be borne in mind that by inattention and neglect, they often end most seriously. Give early thought to a deranged stomach take Holloway's Pills, and

It may appear strange to many, taking into consideration the nature of the early reports, that a territory of such promise should be neglected for so long a period, if these reports were really credited. But many reasons can be assigned for this delay, of more force, too, than the reasons given for neglecting other colonial enterprises of promise, which with a little well-directed energy would long since have been successful. The statement of Goldsmith and party no doubt had much to do with it, for, on returning, when their provisions were exhausted, they were reduced to great privations, having at times to eat sordid grass and to make tea from wild mint found in the neighborhood of lakes. It must be remembered that in those early days it was no trifling task to pack provisions and tools, sufficient to meet the emergencies of the case, so far and through a country where not the first article of any description could be obtained, while the expense of the outfit also was not within the means of any man who might desire to explore it more thoroughly. But principally, it must be remembered, that Cariboo had burst into glory, where no man lacked employment at enormous wages and where all had a chance of securing a rich claim. It was only natural that Peace River should be forgotten, or at least overlooked for a time, although several men in the meantime, viz, in 1866 and 1867, who traded through those regions for furs on their own account, continued to revive the tales about rich diggings existing. Two men named Davis and Johns, fur traders, brought in some gold during those years, having found the Indians with whom their trapping expeditions brought them into communication possessing more or less.

Somewhere about 1864 a Cariboo miner named Michael Poy went over to Omineca, and has passed five years in those regions, but having left his party in 1865, his precise whereabouts at present are not known. His friends say he has accumulated a large amount of money. About one year ago this man remitted \$3,500 in gold to his daughter residing on the Mainland. Poy's party returned, bringing with them between \$4,000 and \$5,000 in dust. Again in 1868 a party of four men, Humphreys, Gaylord, Evans and Davis, commonly known as twelve-foot Davis, struck Arctic creek, which will be mentioned hereafter, and returned the same year. Humphreys remained at Quesnelmouth that winter working for a stake to return to Omineca—representing constantly to all parties that beyond all doubt the mines in that section were well worthy the attention of the public, and he worked incessantly to induce men at Quesnel to fit out a prospecting party for a two years' expedition. Michael Barnes and Vital La Force, two men who had been employed by the Western Union Telegraph Company in exploring for the telegraph route, were fortunately wintering in the vicinity and used their influence in the same direction, being satisfied that extensive gold fields existed in that section. Hence it will be seen that really, after all, there was no lengthened period between 1861 and 1869 without our receiving, in one way or another, confirmatory reports of the existence and richness of the diggings in question.

We now arrive at the period, 1869, when a thorough investigation of the matter was resolved upon. From the condition of Cariboo and Kootenay, although still yielding largely, it occurred to several public spirited gentlemen of the Interior and this city, that if the prosperity of the colony must be immediately revived a new gold field must be discovered. Hence an expedition to Peace River, composed of reliable men and otherwise qualified for the work, was suggested, and the necessary steps taken to procure at once a suitable outfit. From the Government and private individuals the respectable sum of \$2200 was collected for that purpose and the choice of men fell upon Michael Byrnes, Wm Humphreys, Vital La Force, Hawkins, Grant and Kelley. This expedition, which will be spoken of as the Government party, to distinguish it from the Chapman party that followed at the same time, left Quesnelmouth at the beginning of last May, and in October news was received through different channels that they had made an important discovery.

There can be no doubt, nor do we pretend to disguise the fact, that the importance or non-importance of their discoveries to the Colony depends upon the motive of their first report on returning to those that fitted out the expedition. If they acted wrongfully and dishonestly, if they betrayed the confidence of the public from the most base selfishness, it is only right they should be exposed. We propose simply to judge them by their own actions and let subsequent events, so far as they have occurred, decide the question. It is well known that such of this party as returned—for La Force and Kelly remained behind to make arrangements for the ensuing season—gave a verbal statement merely to their employers, so unsatisfactory in its nature and so utterly at variance with the reports previously received at Quesnelmouth through different channels of the result of their labors, that it aroused public indignation. They then gave a written report as follows:

Quesnelmouth, Oct 24th, 1869.  
Messrs G B Wright, P C Dunlevy and Hon E Dowdney—GENTLEMEN:—We send you the following report of the Peace River prospecting party: The party of six men left Quesnel on the 3d of last May and arrived at Bulkley House on the 6th June, and left there for the headwaters of Findlay's Branch on the 9th of that month—course nearly N E for 50 miles and on a very difficult route. There is much brush and many fallen trees, with some troublesome swamps. We began prospecting on the 21st June and were fortunate enough to find some gold in a small creek on that date. We worked three months and a half with two strings of sluices and took out 35 ounces of each man in that time. The diggings are shallow. We have worked 800 feet of ground. I send you a sample of the gold taken out. We have prospected each way from where we have located for about twenty miles without finding any other paying prospect. There is a narrow range of blue and yellow talcose slate with innumerable small veins of quartz, intersecting it—general course N W and S E. This range is cut off at the south fork of Findlay's Branch by a mountainous range of granite. We intend taking out supplies on the snow. We shall then be better able to prospect next season and ascertain with certainty whether the new district will pay or not. A rush of miners to that section, until the extent and value of it is better known, can only prove disastrous and result in serious injury to the colony. It is better, perhaps, not to publish this report in the public prints until something more may be known of the country.

We have found a few pieces of native silver and some indications of copper.  
Please accept our sincere thanks for your kind assistance to the expedition.  
Your obedient servant,  
MICHAEL W BYRNES.

For the P R P Party.  
This report was no more satisfactory than the first statement, and if anything rather increased public criticism, because they had made different statements to their personal friends, and were proved to be in possession of large sums of dust, Humphreys having about the same time deposited on his own account 70 ounces in the assay office at Barkerville. Taking these facts as they stand, the Cariboo Sentinel of 27th Oct, speaks of them in the following severe terms:

THE PEACE RIVER EXPEDITION.—It is generally reported that the exploring party who have lately returned to Quesnelmouth have purposely concealed the true facts relating to their experience of the country they were sent to explore and prospect, and that they have struck much better mines and brought down more gold than they are desirous of acknowledging. By the express which left on Monday Fred Black and John McLane left for Quesnelmouth to join the expeditionists who intend to return immediately to the Peace River country. It is said that Black received a letter urging him to leave all his interests here and join the returning party. Another invitation of like urgent character, it is said, was forwarded to Duncan McMartin at Keithley creek, who thereupon left for Quesnelmouth. All this and much more leading to the inference that the expeditionists have understated the facts for selfish purposes of their own. We know that application was made to the Gold Commissioner here to allow the party to preempt claims of more than the legal size, and was very properly refused. Government money and money obtained by public subscription sent out the explorers, and in giving their friends the preference to the benefits of their discovery, where no preference should be given, but a fair field and no favor, the explorers have acted unfairly. They have no right whatever to monopolize for themselves and friends the benefits of their discoveries. The Government and the people who gave the funds for their equipment are entitled to a full and fair report of everything they have done during their absence.

THE ROAD TO SOOKE.—The people of Metochosin and Sooke have placed a petition in the hands of the Member for District No 2, in which they ask for an appropriation for the construction of a road from Victoria to Sooke. The present attempt for a road is impossible, and communication with this city is only had by water. Sooke and Metochosin are thriving communities, and a considerable sum for road tax is contributed to the revenue, little, if any, of which is applied in the districts. The prayer should receive favorable consideration at the hands of the Council.

INDIAN MURDERS.—The sloop Native arrived yesterday and reports the schooner Caroleona outside. Six Indians have been murdered at the entrance of Knight's Inlet—near the scene of the Eliza piracy. They were from Victoria. The butchery is described as frightful. After the murders the property of the unfortunate man was divided among the slayers. We believe a statement has been sent to the Government.

A WAIF RETURNED.—Yesterday arrived back the lifeboat of H M S Sparrowhawk, which was stolen from the ship by several deserting sailors a few weeks ago. Mr William Bugg was the person who brought the boat in. He found it at Dungeness, on the American side, where the deserting sailors had left it.

\$20 REWARD.—The Committee of the Mechanics' Literary Institute, finding that books, papers and magazines are systematically carried away—stolen, in plain terms—offer a reward of \$20 for such information as will lead to the detection and conviction of an offender. The practice of carrying off the property of the Institute is most detestable, and the culprits are assured that if caught they will be prosecuted for felony. A word to the wise ought to be sufficient.

SPLENDID MACHINERY.—Mr Edgar Marvin shipped by the Enterprise yesterday some fine brass and iron castings for the Messrs Wright & Co's steam Victoria on the upper Fraser. The castings are from the foundry of the Albion Company, and will compare favorably with any manufacture of the kind on the Pacific Coast.

THE CONDITIONS.—Elsewhere will be found the corrected official conditions of the proposed union with Canada. The exhibit of figures is both interesting and satisfactory. It is seldom that so few figures are made to say so much and say it so intelligibly. If there are still to be found those who think this colony has nothing to gain from Confederation we would commend to such a careful perusal of these figures.

THE SURVIVOR.—The condition of this schooner, which was wrecked on the west coast of the Island during one of the terrible gales of December last, is said to be satisfactory. Her repairs are progressing and she is expected to arrive at this port in a few weeks.

GOVERNOR MURRAY.—Yesterday the splints were removed from His Excellency's leg when it was found that union was complete. The speedy restoration of the Governor to health is now assured.

THE CALIFORNIA.—This steamer sailed from Portland last evening instead of on Tuesday evening. She arrived on Monday at Portland.

THE PUBLIC ACCOUNTS, audited, to the 31st December, 1869, will shortly be laid before the Legislative Council. This is a great improvement. The accounts were wont to be a twelvemonth behind legislation.

THE NEW POUNDKEEPER.—Joseph Dawenap is the suggestive name of the new pound-keeper.

THE ESTIMATES.—We understand that the estimated revenue for 1870 is \$537,750; and that the estimated expenditure is \$513,735 00.

'STABAT MATER.'—A number of ladies and gentlemen of this city have rendered a concert of sacred music for the benefit of the Mechanics' Literary Institute. Yesterday the General Committee of the Institute met and accepted the kind offer of the amateurs and the concert will come off at the Theatre on some evening not remote. There will be 40 voices and an orchestra of 15 or 18. The organ recovered from the fire at Christ Church Cathedral will be used on the forthcoming occasion. This organ, it will be remembered, was carried from the burning building in pieces and piled upon the rocks in a miscellaneous heap of apparent ruin. The fragments were subsequently sold for \$100 to Mr W S C Seeley, of this city, who being an organ builder by profession put it together and supplied such parts as were lost, and now the noble instrument gives forth tones as deep and rich as those which once reverberated and thrilled through the walls of the lost edifice.

GOLD has been discovered in Lapland. Two men, who formerly worked in the California mines, wandered last summer over a part of Lapland, and it is said found gold in large quantities. One nugget as large as an eight-ducet piece was pure. The government of the district in which the discovery was made bought this piece for ninety-three marks, and then forwarded it to Helsingfors. The men endured many privations during the four weeks employed in traversing an uninhabited region, and they were finally compelled to discontinue their search by scarcity of provisions. In conjunction with a third person, who had earlier been engaged in gold washing in Australia they are now petitioning the government for permission to search for gold in Lapland. The results of the summer's work of the two men were satisfactory, for they obtained sixty ounces of gold, for which they received six thousand marks.

I. O. F. COLUMBIA LODGE, No 2.—This lodge was instituted on Tuesday evening, and the following officers were duly installed by D. D. G. M., J. S. Drummond, J. P. Davies, N. G. L. Vigilius, V. G. Wm. Wolf, R. S. J. Fel, Treasurer, T. Shotbolt, Warden, E. Levy, Conductor, J. Lowen I. G.

THE steamer Otter is engaged in freighting Colonial lumber to Esquimaux for the bark Prince of Wales. The lumber will be carried to England and sold there.

SEND IT TO YOUR FRIENDS.—Copies of the Colonist containing the Governor's Speech, the Terms of Confederation, and the Peace River News may be had at the publication office and at bookstores.

THE bark Ruby, Capt Van Norden, sailed yesterday for Australia with a full cargo of lumber.

THE steamer Enterprise sailed at 9 o'clock yesterday morning for New Westminster carrying 15 passengers and Barnard's Express.

## THE HUDSON'S BAY COMPANY

Have now in Stock and offer for Sale,

Ex PRINCE of WALES from London,

The undermentioned Merchandise

Powder—Blasting

Shot—Nos. 1 & 6 AAA, and No. 28 ball

Bags—Grain, Dundee & Gunny

WHARF STREET, VICTORIA, V. I.

Our modern course of living begets a condition of the body that requires occasional relief. The system becomes enfeebled, deranged, clogged, and labors in its task. The mind sympathizes with it and both sink, or are depressed together. To restore the vital energies, purify the system—cleanse the blood—take Ayer's Pills. (Glasgow (Ky.) Free Press.)

REMEMBER THE FATE OF ABSALOM.—Fred. Payne, Tonsorial Artist, Shaving 12½ cts, Hair Cutting 25 cts, Shampooing 25 cts. That original cheap Shaving Shop stands on the sunny side of Johnston street.

J. H. TURNER & Co. have received by steamer yesterday a very large lot of hemstitched linen cambric handkerchiefs. Being the clearing out of a manufacturer's stock they will be sold at little over half the usual Victoria prices.

"While there is life, there is hope." The inventor cured himself by this great medicine, after he had been pronounced incurable by several of our ablest physicians. He carefully studied the nature and effect on the system, of each of the vegetable products of which it is composed and after long and laborious experiment, was enabled to produce the best possible result of their combination. Dr. Walker's Vegetable Vinegar Bitters made a new man of the inventor, cured his neighbors, and is now publicly introduced for the welfare of mankind.

HOLLOWAY'S PILLS.—This medicine has related every test which time, prejudice, and vested interests could devise upon it, and it stands forth triumphant as the most reliable remedy for those derangements of the system so common at the change of seasons. When the air grows cooler and the functions of the skin are retarded, an occasional dose of Holloway's Pills will call on the liver and kidneys for greater activity, and compensate the system for diminishing cutaneous action. As alternatives, aperients, and tonics, these Pills have no equals. To every accident and delicate person, whose appetite is defective, digestion indurated, and tone of low health, this medicine will be a precious boon, conferring both ease and strength.

BREAKFAST—EPPS'S COCOA.—GRATEFUL AND COMFORTING.—The very agreeable character of this preparation has rendered it a general favorite. THE CIVIL SERVICE GAZETTE.—"The singular success with which Mr Epps' Cocoa is used by his homoeopathic preparation of cocoa has never been surpassed by any other preparation. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctor's bills." Made simply with boiling water or milk. Sold by the trade only in 4lb, 2½ lb, 1½ lb, tin-lined packets, facsimile—James Epps & Co., Homoeopathic Chemists London, England.

Important Information!!  
A Good Appetite,  
A Vigorous Digestion, and  
A Healthy Liver.  
Are the sure and immediate effects of a course of Bristol's sugar-coated Pills and Bristol's Sarsaparilla.  
Try them!! Try them!!

THERE IS BUT ONE  
American perfume that has stood the test of time, and that is MURRAY & LAMMAN'S FLORIDA WATER, which, for over thirty years, has been in constant use, and which is today admitted by every chemist, and which is adapted to the various uses of the toilet, the handkerchief and the toilet.

Be warned of the pernicious counterfeits; always ask for MURRAY & LAMMAN'S FLORIDA WATER, and get the genuine.

Boys' Gymnasium,
